He had gone but a few steps when he heard someone say: "Here, you miserable dirty sneak, get out of here.' He turned his head a little to one side, and seeing no one, thought one of the boys was talking to some hogs in the corn, which was about up to his shoulders. He had taken but one or two steps further when the same language, louder and more forcible, was repeated: "Here, you --- miserable dirty sneak, I want you to get out of here!" He turned and looked to the north, and about five or six rods away he saw Moiles: understanding then for the first that the salute was meant for himself and came from Moiles. Angell says he picked up two stones and threw them, as he says, not at him, but as a bluff, to scare him and send him along about his business. He was looking for the third, when they came together and clinched. He is positive that neither stone hit said Moiles. In the melee he got Moiles down, though the latter got in two blows with a steel railroad cut-off chisel which he had in his hand, making a cut over Angell's eye and a bruise on the chin.
